

**P&O FERRIES STATEMENT ON TRANSPORTATION OF YOUNG CALVES TO
CONTINENTAL EUROPE ACROSS THE IRISH SEA**

Release time: immediate

We can confirm that P&O Ferries will cease co-operating with the Scottish Government to transport across the Irish Sea young calves destined for continental Europe with immediate effect. We place the highest priority on animal welfare across all of our routes and were shocked by the scenes in last night's documentary. We will not hesitate to act decisively and close the account of any customer which breaches our policies in this area.
